Information and Knowledge

Information: Structured facts and data that can be observed, measured, and communicated to convey meaning.

Information : **“Real time data on energy production from renewables and demand profiles for a Town”**

Knowledge: The applied understanding gained through education, experience, collaboration and reflection that enables problem-solving and decision-making.

Knowledge : **“Knowing how to interpret, clean and use that data to simulate power flow and optimize power network.”**

Identified Barriers in knowledge sharing

Lack of time

**Lack of financial
and human
resources**

Lack of trust

**Organizational
policies**
do not prioritize
knowledge sharing

**Language &
Distance Barriers**

Technical Barrier
Digital knowledge sharing
platform problems

**Lack of systematic
procedures**

**Diverse
stakeholders**
Knowledge gap

0	No Influence

Barrier 1	X	2	4
Barrier 2	2	X	3
Barrier 3	1	2	X

How DEMATEL Works (Process):

- Compare barriers' influences with each other and Rate the influence 0-4.
- E.g. how strongly does **Barrier 1** affect/influence **Barrier 2**?
- Think about one-way influence only!
- You can either:
 - Rate quickly based on your experience
 - Feel free to share your reasoning for each rating

Methodology

Why Cause – Effect Analysis (DEMATEL – MCDM):
